

“ We have been very pleased with Langer’s experience as Project Managers and their experience with building churches. You can tell that Langer has done a lot and is very aware of all the different committees you have to work with (architect, parish, etc.) and the responsibilities that come with planning a church project.”

Ms. Lisa Sammon-Roach  
Director of Business Administration  
Divine Mercy Catholic Church

This project consisted of a 26,000 square foot new facility; featuring a 1,200 seat sanctuary including a 70 foot tall bell tower housing bells from the 3 historic churches and holding a spire which tops 120 feet tall. The project also incorporated limestone flooring, baptistry, and buttresses, as well as a generous gathering space that includes a kitchen and social area. Development of 30 acres of land including streets and public utilities was also a part of the construction process.
