

“ We had two record breaking months during the middle of the construction process. [Langer’s superintendent] really did a great job keeping all the equipment out of the way so our customers had access to our facility. I don’t think there was anything [Langer] could’ve done better. You guys are the best of the best!”

Mr. Dan Sjolseth
Owner
Superior Service Center

This project included the addition of a 12,000 square foot collision repair building and full remodeling of the existing 5,000 square foot service facility. The building includes hoists, racks, used-oil heat recovery system, and the installation of new water based paint booths.
