

“ Langer Construction did a great job. They worked to accomplish all our needs and delivered the project on time.”

Mr. Joe Tikotzky
VP of Site Management
Villa Healthcare
Skokie, IL

This 12,000 square foot project involved the construction of a new transitional care wing as well as renovations to the exiting long-term resident facility. The new addition includes 12 short-term rehabilitation inpatient rooms with private bath, state-of-the-art rehabilitation gym, dayroom with outdoor patio, physicians lounge, nurse stations, kitchen, dining and activates area, central shower and spa space, and entry/waiting room.

Renovations to the existing facility included both exterior and interior improvements with 8 fully renovated inpatient rooms to mirror those created in the addition. This transitional care wing is also Medicare certified.
