

### 300 seat worship space addition for expanding Bloomington church

Langer Construction worked with Southtown Baptist, located in Bloomington, Minnesota to complete an addition for their expanding congregation. The project included a new 300 seat worship space, restrooms, commercial kitchen, spacious narthex, baptismal pool, church offices, and fire sprinkler throughout the existing building.

The parking lots and drop off areas were also re-worked to accommodate land sale to a developer. As is common with many of the projects Langer Construction is a part of, they also worked with volunteers to complete painting, wood fencing, as well as interior remodeling of the existing worship space.
